Reasons For Allowance

The prior art of record does not disclose or fairly suggest a oral mouthpiece and method for delivery of medicaments comprising upper and lower members, each conforming to a gum line, the members joined by two hinges that provide a compressive force to maintain the members in contact with the gum line, the hinges being shaped like an "E". The unique shape of the hinge that is disclosed as providing better compressive force and being more comfortable in use, distinguishes this device from prior art such as U.S. Patent 3,536,069 to Gores.
